ABOUT THE PROGRAM

- At the Carbondale Area Cyber Academy, we are dedicated to providing our students a dynamic online learning environment.
 - The Carbondale Area Cyber Academy was established in 2018 and currently has 100 students ranging from kindergarten through 12th grade.
 - Unlike other cyber programs, we allow our students to work ahead and do not limit the amount of work a student can complete each day or each week. This allows students the opportunity to work ahead in their classes and possibly complete them early.
 - Carbondale Area Cyber Academy students have the opportunity to participate in all school related activities, this includes but is not limited to athletics, clubs, class trips, and prom.
 - Students who graduate from The Carbondale Area Cyber Academy will receive a Carbondale Area School District diploma and will be able to walk on stage if they choose to.
- At the Carbondale Area Cyber Academy we provide our students with an additional layer of support from our Cyber Coordinator Mr. James Kielar. Mr. Kielar supervises our Cyber Lab. The cyber lab will be a computer lab located at The Carbondale Area Jr. Sr. High School. The cyber lab will be open for students to come in as needed for additional 1 on 1 help with their school work.
 - Cyber students are eligible to receive free lunch in our cafeteria.
 - At the Carbondale Area Cyber Academy, our goal is to make sure that every student is successful. We show our commitment to this goal by continuing to evolve and enhance our program.
